This is outrageous!! I pay good money for the subscription that is provided to me. The NAB should not be able to have an input into this matter. Subscription cable is not regulated by the NAB and satellite radio should not be either!! I use this service as a truck driver with his own authority, to know what I have ahead of me in the major cities. Without this service the local city interstates are more likely to become congested when it could be avoided by allowing us to keep this much needed service.

I FULLY REJECT THE NAB'S PETITION 04-160!!!!!!11
